

COMMERCIAL & INDUSTRIAL **PORTFOLIO**

As we celebrate over 20 years in partnership, we reflect on designs inspired by people who appreciate architecture. Every design starts with investor vision, meeting architectural creativity, further complimented by an experienced team, equipped with the latest technology the industry could offer. Whether private houses or five-star lodges and hotels, commercial properties, we can assist with detailed designs, photo-realistic 3D rendering, technical detailing, contract administration and project management to the point of construction completion and handover.

THE PARTNERSHIP SYNERGY

WE OFFER A COLLECTIVE EXPERIENCE

The Förtsch+Associates partnership was created from the synergy between the two partners: Reiner Förtsch as Architect and Barry du Plessis as Construction Law specialist and Project Administrator who have been working together in the architectural field for more than 15 years.

They gained significant experience at the Johannesburg office of Meyer Pienaar Architects for 9 years, working on large scale developments together and gaining collective experience in various aspects of architectural practice.

The partners formed their practice in 2003 and have since then been responsible for the design and project management of a wide variety of successful building projects such as hotels, commercial offices, private game lodges, country lodges, private residences, urban design projects and motor showrooms for prestigious clients.

The partnership is also credited with the conceptualization and planning of private residential estates such as Wild Fig, Sabi River Eco Estate, Sonyaka and several others. The partnership has secured the appointment for the first Safari Hotel under the Radisson brand and have designed several prestigious private lodges such as Huja Camp, Simbavati Tented Camp and tourist attraction, the Graskop Gorge Lift.

Our commercial profile includes the Golden Macadamia Plant, De Hallen Shopping Centre, amongst others. Förtsch+Associates Architects have built up a strong client base of respected individuals and organizations

ABOUT OUR CORE VALUES

The Förtsch+Associates Architects team is geared to produce world class architecture for clients in the Lowveld region and major South African and international cities – building on an existing reputation of producing quality architecture.

We maintain high standards of creativity in design and project management services to our clients and constantly explore new technologies and methods to achieve above average architecture that enhances the environment and the investment value of property and the living environment of its people.

Today's construction environment demands a keen eye for contracts and requires dedication and commitment to drive any project to successful completion within budget and time constraints. The principal philosophy of Förtsch+Associates is to create architecture in harmony with the environment – with respect to nature and its various complexities and sensitivities

TECHNOLOGY

PROJECTS IN DESIGN | 3D RENDERS

Apart from design, we can offer a visual photorealistic walk-through of your project prior to building stage. This conceptualization and 3D modelling helps both client and architect communicate ideas with ease while viewing realistic images of the project, both exterior and interior. Discussing important features like light, space, flow and structures. Seeing the vision before it's in building phase, offers investors the ultimate experience to assist with important decision making.
